The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. Claims 20, 21 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2206622A. GB '622 shows a subsea completion/drilling system with a well housing 14 forming a part of the framework 1 prior to installation over the well 16, a barrier package 40 (figure 2) for controlling fluid flows to or from the well, the barrier package being removably located on and connected to the framework, the corners, that is also connected to the barrier package (figure 2) and containing at least one production flow control valve capable of containing the well pressure in use; wherein a continuation of the production fluid conduit (21) extending away from the wellhead is releasably coupled to the barrier package by a subsea matable connector (3) whereby the barrier package and components supported within the wellhead can be installed and retrieved independently of each other.

As concerns claims 22-23, GB '622 shows the structural members arranged in a pattern (fig. 1) forming a polygon (claim 23).

As concerns claim 24, GB 622 shows the framework including locations for the barrier packages or modules, and all the modules/packages and connecting locations have a common connecting interface such that the modules/packages can be exchanged with each other and secured at any connecting location on the framework (fig. 2).

Art Unit: 3671

As concern claim 25, GB 622 shows a fluid conducting pipe comprises a structural part of the framework (fig. 3).

Allowable Subject Matter

2. Claims 1-19 are allowed.

Response to Arguments

3. Applicant's arguments filed 06/30/05 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas A. Beach whose telephone number is 571.272.6988. The examiner can normally be reached on Monday-Friday, 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 571.272.6998. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

Art Unit: 3671

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
